

**Fish**

**A fish has gills to breathe with.**

**People cannot breathe in water. We have no gills.**

**Scales are hard. Scales give a fish a hard coat.**

**Some fish are narrow. They can swim fast in the water.**

**A fish has fins and a tail to swim with,  
and steer with.**

**Some fish eat seaweed. Some fish eat insects.**

**Some fish eat other fish.**

**When the water is warm, the fish's blood is warm. A fish is as warm as the water it swims in.**

**When the water gets cold, the fish's  
blood gets cold.**

**Because a fish's blood can get cold  
fish are called cold blooded animals.**

**Fish have bones.**
