

# Flowers

**Many plants have flowers.**

**Many flowers have bright colours.**

**The petals have bright colours.**

**In the middle of the flower is a little box where the seeds are made.**

**Around this little box are some yellow parts with pollen on them.**

**Pollen makes the seed begin to grow.**

**Bees and other insects and the wind  
move the pollen into the seed box.**

**Flowers that have bright colours are easy for the bees to see.**

**Some flowers are red. Some flowers are yellow. Some flowers are orange.**

**Flowers with a strong smell are easy  
for bees to find.**

**When the pollen gets into the seed box the seeds are made.**

**Seeds start new plants. The seeds spread about and new plants begin to grow.**

**Some seeds are spread by birds.**  
**Some seeds are spread by animals.**  
**Some seeds are spread by the wind.**
