

# Ferns, Moss and Fungi

**Ferns do not have flowers. Most ferns like to grow in wet places.**

**Moss is another kind of plant. It does not have flowers. It likes to grow in wet places.**

A fungus is another kind of plant. It does not have flowers. A mushroom is a fungus.

**A toadstool is a fungus.**

When we have more than one fungus, we call them fungi. Some fungi are bright colours like red and orange.

**Some of these are poisonous. We cannot eat them.**

**Mushrooms and toadstools are not green like other plants.**

**Some plants have flowers.**

**Some plants do not have flowers.**

**Some plants are green.**

**Some plants are not green.**
