

Light and Colour

1

Because of light we can see things.

2

In the dark you cannot see at all.

3

The sun gives us daylight.

4

**The moon gives us moonlight.
The moon is like a giant mirror.
It bounces sunlight on to the
earth.**

5

**Fire gives us light.
Electricity gives light.**

6

**God made these things to
give us light.**

7

**The sun sends out rays of light. It
shines on the Earth. But the sun
shines only on one side of the
earth at a time. Half the earth has
daytime while half the earth has
night time.**

8
