

Light and colour

Because of light we can see things.

In the dark you cannot see at all.

The sun gives us daylight.

The moon gives us moonlight. The moon is like a giant mirror. It bounces sunlight on to the earth.

Fire gives us light.
Electricity gives light.

**God made these things to give us
light.**

The sun sends out rays of light. It shines on the Earth. But the sun shines only on one side of the earth at a time. Half the earth has daytime while half the earth has night time.
