

Mammals

1

Cows, horses, pigs, sheep, cats and dogs are all mammals

2

An elephant and a mouse are also mammals.

3

A mammal is an animal that feeds its babies on milk

4

Most mammals have hair, wool or fur.

5

A mammal's blood is always warm. Tigers, lions, whales, and all other mammals have warm blood.

6

Most mammals have babies that are born. Their babies do not hatch from eggs.

7

There are only two animals that have babies that hatch from eggs. These animals live in Australia. They are the platypus and the echidna.
